I'm sure you've picked up on my passion for these products in my recent emails...

These are the moisturizers I use, trust and recommend. Why?

Because:

- They're made from 100% natural and top-quality ingredients
- There are NO toxins, hidden chemicals or contaminants
- They work! Want naturally soft and youthful-looking skin?... Look no further!
- Can be used to moisturize your whole body

In my emails, we've explored why this all matters so much, and:

- Revealed the hidden chemicals lurking in many skincare products
- Looked at the work of the Environmental Working Group and what they uncovered about just one nasty contaminant – 1,4-Dioxane
- Checked out the healthy and natural alternatives [brand name removed] offer...

And I'm sure you realize this is a unique and incredible moisturizer range... AND the answer to the toxic issues we've discussed.

And right now, you can save with these exciting offers! (Does it get any better than this?)

We can only offer these savings for the next 48 hours... And I really don't want you to miss out.

So click the button to buy now...
